

An elderly man with grey hair and glasses is looking down at a white tablet computer he is holding with both hands. He is wearing a light blue button-down shirt and a watch on his left wrist. The background shows a home office with a desk, a chair, and a wall covered with various photos and documents. The lighting is bright, suggesting a window nearby.

*Can you trust
your 'smart' home
appliances?*

PROGRESSIVE

Yes, you can.

Remaining independent, you should not have to compromise your own safety, security or privacy. There are **standards** to help make sure that smart homes respect you and your visitors.

Visit the *PROGRESSIVE* website and know more about the Smart House Code of Practice CLC/CWA 50487 and other relevant standards around smart homes for ageing well.
